

International City Vienna

Vienna is a city that is synonymous with a high quality of life. This is regularly confirmed by official rankings. Vienna has been at the top of prestigious city rankings compiled by the Economist Intelligence Unit¹ and the consulting firm Mercer² for many years. This explains why international organizations and leading global corporations feel so at home here. However, Vienna is not only of global importance as a headquarters city: the city also has a reputation as a KnowledgeCity, a CongressCity and a “DiverCity”. And each of these roles is signaled visually by a striking landmark.

For example, Vienna’s Donau City, which is home to major global corporations as well as many UN organizations, is considered the heart of the HeadquarterCity. The United Nations has defined Vienna as one of its four official seats and is represented here with numerous organizations. The IAEA (International Atomic Energy Agency) and OPEC (Petroleum Exporting Countries) also have their headquarters in the city. In total, international institutions secure almost 20,000 jobs in Vienna³. 180 multinational corporations take advantage of Vienna as an ideal location for servicing Central and Eastern Europe. Illustrious Austrian companies such as Wienerberger AG and OMV have also selected Vienna for the head offices of their groups.

The city’s high quality of life and safety are reasons why international companies and organizations choose Vienna as a location to do business. Its multinational flair contributes to Vienna’s popularity among congress organizers and participants worldwide. The conference statistics for 2024 reveal that 6,619 congresses and corporate events were held with a total of 1,999,000 overnight stays, accounting for 11% of the total number of guests in Vienna. In the ranking of the ICCA (International Congress and Convention Association), Vienna can always be found towards the top of the list: in 2024, Vienna took 1st place in the ICCA analysis of worldwide (association) congresses.⁴ In addition to good accessibility and top services for event organizers, CongressCity Wien provides attractive event venues such as the Hofburg Vienna, the Austria Center Vienna and the VIECON – Vienna Convention & Congress Center.

Vienna’s importance as a city of knowledge is another motive for many organizers to bring their conference to Vienna. With a research ratio of 4.0%,⁵ Vienna is one of the leading regions in the EU. Around 50,000 people are employed in research and development. The number of research companies in the city has more than doubled in the past 15 years. And with around 197,000 students, Vienna – together with Berlin – is the biggest university city in the German-speaking countries⁶. The mdw – University of Music and Performing Arts Vienna is one of the best music universities in the world⁷. In fall 2019, the new Central European University added another location to KnowledgeCity

Vienna. The campus of the Vienna University of Economics and Business, the Neu Marx Research and Technology Center with the Vienna BioCenter, the campus of Vienna University and Siemens City also generate significant stimuli in the field of research.

The international character of the city is based on its cosmopolitanism, which in turn is rooted in the multicultural make-up of Vienna's population. A stroll through one of Vienna's markets, such as the Naschmarkt, illustrates this as clearly as a glance at traditional Viennese cuisine. The dishes found there from every country that once belonged to the Austro-Hungarian Empire and offer a delicious testament to cultural diversity. DiverCity Vienna is currently a home and place of employment for people from all parts of the world, around one third of Viennese were born outside Austria and almost 50%⁸ of the two million residents⁹ have a "migrant background" – in other words, both parents were born abroad, with members of the First Generation having been born abroad and members of the Second Generation having been born in Austria¹⁰.
